

How can you create a **BRIGHTER FUTURE** for Hillsborough County?

By
INVESTING
in early learning!

Hello Human Resources Representative,

The School Readiness (SR) program offers financial assistance to eligible employees for early child education and care so employees can become financially self-sufficient and their young children can be successful in school.

Hillsborough County employers can help support their workforce by participating in the School Readiness match program. Subject to availability of funds, every dollar you contribute has the potential to be matched to help expand the provision of services to employees who typically would not be income eligible for child care assistance through the School Readiness program.

To find out how your company can participate in the SR Match program, please contact **communityrelations@elchc.org** to schedule a meeting.

Why does it matter?

Your company's contribution has the potential to strengthen your workforce and internal culture by improving employees' ability to work and earn more-reducing missed workdays and increasing productivity. Employees' children enrolled in School Readiness will have equal access to and participate in a safe, high-quality early learning program. Investing in early childhood education is an investment in your business, the local economy, and our entire Hillsborough County.
